The first church gathered after the Revolution was in 1785—First Universalist Church, Hanover street. The next one was in 1789, Church of the Holy Cross, Roman Catholic. And so they come down, eighty-three more churches, to the church hast gathered, which was in 1853. This is the Presbyterian Church which worships at the Melodeon, under the name of Free St. Andrew's.

SCARCITY OF BREADSTUFFS IN OHIO.—A week to two since, we learned on Water street, very much to our surprise, that a produce operator from Cincinnati had just closed a contract with one of our city firms, for a large lot of wheat, (something over 40,000 bushels.) to be delivered in the month of June. The grain was held upon the Illinois river, and the figure at which the sale was effected was not made public, though understood to be considerably in advance of ruling rates at the time of the massection. This was the first intimation we had received of a probable scarcity of breadstuffs in Ohio. We had supposed the production of last year, aside from what went forward prior to the close of navigation, would be sufficient to supply the bome demand, and leave considerable margin besides, for export. Since the transaction to which we allude, we have learned that parties from Cincinnati, and other Ohio mills, have visited other lake ports, and made purchases of wheat for summer delivery. The Oswego Times of the 21st, announces the presence of one of them as far east as that port, whose object is to buy grain to ship back to the west.

This is a state of facts for which we presume but

This is a state of facts for which we presume but few western operators were prepared. Ohio is one of the most productive of the western States. In 1850, according to the U.S. Census returns, the following amount of breadstuffs was produced in that State:— 

Wheat, "14,487,381
Rye, "25,918
The wheat crop of last year in Ohio was estimated at something over 20,006,000 bushels, and we presume there was a corresponding increase in corn and rye over the productions of 1850, though in regard to the two latter we have seen no estimate. If it be true, as the foregoing facts indicate, that there is really a deteil in the supply of breadstuffs in Ohio for home consumption, the fact cannot fail to affect the produce markets more or less throughout the country, unless, indeed, the other Western States and Canada shall be able to send forward more than their usual quantum. Operators and producers will of course form their own conclusions as to how far the movements emanating from Cincinnatia are the result of short supply, and to what extent they are the offspring of speculation.—Chicago Dem. Press.

Except they are the offering of speculation.—Chicago Dem. Press.

Reservation of Mn. Evenert.—It is understood that Mr. Everett, a day or two since, transmitted to his Excellency the Governor the resignation of his sext in the Senate of the United States, to take effect from the 1st of June next. He will shortly return to Washington and resume his seat until that time, when, doubtless, a successor will be appointed and in readiness to take his place. Mr. Everett has been compelled to this step by the state of his health, which has become so impaired as to incapacitate him for the satisfactory discharge of the laborious duties of his station, and to even render it dangerous for Mr. Everett's resignation seems to be imperative, it is well known to his friends that domestic circumstances have contributed to the necessity of his taking this step. The extremely delicate state of the bealth of a member of his family has been such as to make it necessary for him, during the purpose of visiting Boston, and has rendered his absence from home in the interval a source of serious inconvenience and distress. It is understood, also, that the Hon. English Choate has resigned the office of Attorney General of the Commonwealth, and that his Excellency the Governor has noninated as his successor Mr. Clifford, the late Governor, who held the same office previously to his being called to the Executive chair. This appointment has not been yet confirmed by the Council, the period for which it is required for the nomination to stand before confirmation not having yet expired. Mr. Cheste left town a few days since for Washington, for the purpose, it is supposed, of attending a session of the Regents of the Santhsonian Institution.

The "Lost Creek Township Church," of Vigo county In., publishes an impostor, one Jarrett Charris, a colored Free Will Saptist preacher. The order of the church declares that Charris has been found guilty fraud, falsehood, and adultery. Was he, too, "one of the eigeness?"

## FINANCIAL AND COMMERCIAL.

MONEY MARKET.

The stock market has for several days past been particularly active, and prions have fluotuated largely. The hall and beer interests have at times been in the accordency, and opportunities to realize, both for the shorts and for holders, have been presented. At the close yes tarday the tendency was downward, and prices current show in a majority of instances a depresiation compared with those ruling at the close of the week previous. There is no difficulty about the money market. Capital is abundant enough, and the backs are enseedingly liberal in their offices to loan or call; but the beckers are not disposed to accept such favors, and place thousened in a position to be compelled to make great anci-focus at a moment's notice. In this they are right, for we have recent hastances of serious losses from such contracts. Lemms on thirty, sirty, or mosty days are much more desirable; and if they cannot be made at such dates they had better not be made at all. We see no probability of even a moderate improvement in fancy clocks. The times are not propositious, and no one seems disposed to touch anything in the way of speculation which has not real, tangible value. Moneyed usen are now looking after the substance, not the shadow.

The outward innerement of specie from this part has

We have had but one larger week's shipment than the above this year; but we have no idea that it will be the last. The probability is, that the shipments will in-crease matead of diminish. So long as the drain upon the Bank of England continues at the rate it is now going on, every effort will be made to draw bullion

from this country, and we shall feel it in this market very severely, when the country banks commence drawing upon us for specie. At the present moment, the preclous metals are flowing in upon us from every direction; but ultimately this will change and we shall experience a drain not only for shipment to Europe, but for shipment to the Southern and Western sections of our sym country.

The Galena and Chicago Union Railroad Company have resolved to increase its capital stock twenty five per cent on the 1st of June, and twenty per cent on the 10th of August, making an aggregate of fifty per cent on the present capital as will be seen by the following statement:—

The total amount of capital stock provided for

the management of the northern lines of railroad from that city.

We look with interest for the report of the sub-committee appointed to carry out the details of a plan for turnishing cars and depot accommodations for the line of roads between Boston and Lake Ontarjo. It is proposed to purchase one thousand cars at the united cost of the several roads, and place them under the superintendence of a special olines, appointed by the concurrant action of their respective managers. This will be, in effect, a practical consolidation, which, by imparting unity of purpose, will greatly tend to recombine all conflicting interests. The great increase of business calls for a corresponding increase of facilities, and the receipts of the past year show that nothing is wanted but more ample accommodations to give it a new and decided impetus. Merchandise has been detained at Ogdensburg, week after week, in the busy season, because cars could not be provided in sufficient numbers to meet the exigency of the case. More deposited to give it a new and decided impetus. Merchandise has been detained at Ogdensburg, week after week, in the busy season, because cars could not be provided in sufficient numbers to meet the exigency of the case. More deposited on the large provides for the enlargement of the Laweil depot, where the whole line terminates.

We have the Ogdensburg road was built, the great object of its projectors was to establish an uninterrupted communication with the West, by means of which our internal certainers of the state of the projectors was to establish an uninterrupted communication with the Kest, by means of which our internal certainers when the internal certain certain certain anticipations have not been realized. The surface and the fact that our infand trade has not increased in a corresponding ratio, are conclusive proofs that these brilliant anticipations have not been realized. There is, however, every reason to believe that should any degree of vitality be imparted to our Northern roads, a great develo

to touch anything in the way of speculation which has not real, tangible value. Moneyed uses are now isoling after the substance, not the shadow.

The outward novement of specie from this port last week was quite large, as will be seen by the amount of the day, foll bits., of all kinds.
